

# HOW TO USE SKILL TREES

1. Grab a highlighter or pencils 
2. Start at the base in the basics section and work your way up, color in anything you've already completed.
3. Easily visualise your progress and see your skill gaps. Identify future goals by drawing a ring around the tiles you want to complete next. 
4. Complete your skills dashboard to see your skill levels, and use the coloring guide below to set future goals.
